COMFORT

**HOLTKAMPER®**

For nearly 100 years, Holtkamper has been a leader in the world of luxurious, innovative and high-quality camping solutions. What began almost a century ago as a traditional family business has grown into the benchmark for trailer tents, with a strong focus on both heritage and innovation.

Because our trailer tents are designed, built and thoroughly tested by true camping enthusiasts, we understand better than anyone how adventure goes hand in hand with comfort, ease and a touch of luxury. Each Holtkamper sets up in under 15 minutes and offers everything you need for a restful night beneath the stars.

At Holtkamper, quality, personal advice and exceptional service come as standard. We take a genuine interest in your wishes and are proud to help fulfil the dreams of the modern camper.

There are trailer tents. And there is Holtkamper.

### SLEEP LIKE YOU'RE AT HOME

Camping with a Holtkamper means enjoying the kind of sleep comfort you're used to at home. In the raised sleeping cabin, you sleep in true luxury. The generous cold foam mattress and slatted base offer optimal support and comfort. Ventilation has also been carefully considered. Strategically placed ventilation openings and closable mosquito netting ensure excellent airflow without letting insects in. Everything is designed for an undisturbed night's rest.

### VENTILATION AND CLIMATE CONTROL IN EXTREME HEAT

Thanks to the Holtkamper Membrane Airco Tent System, the climate inside your trailer tent always remains pleasant. The climate chamber between the two roof layers retains warmth during cold weather and prevents condensation during rain. In hot summer conditions, the chamber insulates the roof from within, so the sun's heat penetrates the fabric more slowly. If desired, the roof can be opened, allowing air to circulate freely and providing both ventilation and cooling at the same time.

### PACK-N-GO!

With the Pack-N-Go System, you always have direct access to the spacious storage area, without having to fully set up the trailer tent. Ideal for use on the road, during short stops or when loading and unloading at home.

### SUPERFAST SETUP

The Holtkamper trailer tent can be fully set up in just a few minutes, thanks to the revolutionary Wind@Force System. At the push of a button, the tent unfolds automatically and your holiday can truly begin. Folding it back down takes only minutes as well. It doesn't get any easier than this.

### READY FOR THE FUTURE

Thanks to its low weight and compact design, the Holtkamper is perfectly suited for use with compact, electric and hybrid cars.

### **Nano** *Sleeps 2*

This compact two-person trailer tent with a hardtop is quick and easy to set up by hand. Simply open it up, and you're ready to go. That makes the Nano ideal for touring and exploring. It's a lengthwise sleeper with a large, comfortable bed. Thanks to the raised floor, there's no direct contact with the ground, so cold and moisture are less likely to enter the tent.

### **Astro** *Sleeps 2 to 4*

Twenty years after the launch of this popular family model, Holtkamper proudly presents the new Astro. This updated version sets new records for ease of setup and is the fastest Holtkamper in our range. Configure the Astro to suit your needs. From a robust base model to a fully equipped version with canopy, side panels, kitchen and a children's tent. The darkening inner tent ensures an excellent night's sleep, even in early morning sunlight.

### **Aero** *Sleeps 2 to 5*

The Holtkamper Aero is made for campers who want to combine ultimate convenience with luxury and comfort. Thanks to its innovative design and the integrated Wind@Force system, the tent sets up in just a few minutes without poles or guy lines. Ideal for anyone who wants a quick setup, regardless of the weather or ground surface. The Aero offers a surprisingly spacious interior, making it a great choice even in bad weather.

### **Kyte** *Sleeps 2 to 5*

The Kyte is the ultimate family trailer tent. Whether you are travelling as a couple or with five people, there is always a Kyte that fits your needs perfectly. The pole-free canopy seems to float above the ground, creating a vast covered area. Truly one of a kind.

The Kyte is fully equipped for comfort. The integrated Wind@Force system lets the tent unfold and fold back in at the push of a button. It also comes with a stylish and well-equipped kitchen, featuring three gas burners, a fridge, two large worktops and plenty of drawers.
